

# Stock Overview App

Provides real-time inventory updates, access stock levels across various storage locations and batchstocks from mobile devices

## BUSINESS CHALLENGES

- ▲ Lack of access to real-time stock data delaying stock replenishment processes
- ▲ Inventory information tied to a central desk delays decisions on sales orders and estimations
- ▲ Manual stock checks and follow-ups with managers on stock availability
- ▲ Inability to review stock requirements on-the-move reduces the ability to execute sales orders on time

## BENEFITS AND FEATURES
